Investment involves risks and past performance is not indicative of future performance. Investment return may rise as well as fall due to market condition and currency movement which may affect the value of investments. The value of units may vary due to changes in exchange rates between currencies. Emerging markets may involve a higher degree of risk than in developed markets and are usually more sensitive to price movements.

The return of Sun Life MPF RMB and HKD Fund may be adversely affected by movements in RMB exchange rates as well as foreign exchange controls and repatriation restrictions imposed by the Chinese government as the fund invests part of its assets in RMB denominated money market and debt instruments.

You are advised to read the Principal Brochure and the relevant marketing materials of the Scheme for further details including risk factors prior to making any investment decision.
