Market Review

- The PSEi ended September 0.34% lower to close at 5,864.23 as net foreign selling persisted during the month, and reports of downgrades in economic outlook dampened sentiment.
- Net foreign selling of \$306m in September, elevated COVID 19 cases, and the maintenance of current lockdown conditions drove the market lower for the month.
- The Fund is a mix of equities and cash/fixed income securities and mimics the composition and performance of the equity and fixed income benchmarks.
